

Our new 24/7 Emergency Room is Now Open!

Century City Doctors Hospital A Better Way to Get Better

As one of the first hospitals in Los Angeles that's physician-owned, our priority is patient care. And we demonstrate that priority in many ways.

It starts with our elite staff of doctors and nurses and state-of-the-art facilities. Some of America's leading spine surgeons, world class leaders in total joint and orthopedic surgery, internal medicine and oncology are breaking new ground almost daily in one of the region's most advanced hospitals. But we also know that helping our patients feel better while they're here getting better is therapeutic, too.

That's why we offer amenities such as touchscreen entertainment systems, high-speed internet connections, food service by Wolfgang Puck, and concierge service to our patients. And since Century City Doctors Hospital is contracted with most major insurance companies, fees are comparable to most other Los Angeles-area hospitals.

CENTURY CITY DOCTORS HOSPITAL

a member of the salus surgical group
