

FBI Plans Building at Wilshire and Veteran

A building to house FBI offices is scheduled for construction at Wilshire and Veteran adjacent to the Federal Building.

Before construction can start, a possibility exists that the City will require an Environmental Impact Report. The report would call for public comment as well as studies of the building's effects on such environmental concerns as traffic and air pollution. One question likely to be raised is whether the building's presence so close to UCLA would make it a target for a terrorist attack.
