

## Marble Attack

On Sunday evening, August 15 2004, while the Olympics were underway on TV, an unidentified person shot marbles through at least two homes and at least one truck.

Residents of a house on the 10300 block of Dunkirk and of a house on the 2000 block of Kerwood have filed police reports.

The marbles created holes of 1-2 inches in diameter, and were shot with sufficient force to throw glass 15 feet from the window inside the homes. At the Dunkirk home, the marble put a dent in the drywall 12 feet from the window.

If you see any other property with broken glass or see glass repair workers repairing recent glass damage, you might want to let the owners of the damaged properties know about Tract No. 7260's recent miniature crime wave.
